

Scenario: Jenny is a student who is a Math major. She needs to get a 100 on her next homework. She must use all of the given resources on this website to accomplish this goal.

Task 1: Find the math homework that is due next.

Task 2: Find the math textbook to assist with the homework.

Task 3: Email the teacher so that she can explain a concept you do not understand.

2 things to fix:

Both test subjects were confused when choosing the homework because there is an assignments tab and a homework tab. Change to one tab that says assignments.

Both test subjects chose the math tab over the resources tab to find the textbook. Change the textbook to the math page for easier access.

2 things to remain:

The layout for the classes were very easy and smooth, keep that.

The email was easy to find. Keep that.
